TRANSMITTAL OF TECHNICAL MEMORANDUM NO 10 REMEDIAL ACTION OBJECTIVES
OPERABLE UNIT NO 1 MBA 024 93

Enclosed for your review is the draft final version of Technical Memorandum No 10 Remedial Action Objectives for Operable Unit (OU) 1 the 881 Hillside. This document is an Interagency Agreement (IAG) deliverable and must be submitted to the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH) before the draft Corrective Measures Study/Feasibility Study (CMS/FS) document.

EG&G Rocky Flats Inc (EG&G) would like to draw attention to two issues with the transmittal of this document. First, this document has been revised once to reflect agency comments requesting inclusion of the ground water ingestion scenario as an exposure pathway. Second, EG&G specifically requests that DOE carefully review the document as Attachment 1 is the first formal presentation of applicable or relevant and appropriate requirements (ARARs) for the Rocky Flats Plant (RFP). Mell Roy of DOE has been involved in the meetings on ARARs with the regulatory agencies and her review would be particularly useful in ensuring acceptability of this approach.

Please call C B Gee of Remediation Projects Management at extension 8550 or D M Smith of Environmental Science and Technology at extension 8636 if there are questions
